Education

CMR College of Engineering & Technology (JNTU-H) **2022 – 2026**
B.Tech in Artificial Intelligence & Machine Learning | Minor: CSE – Data Science CGPA: 8.59/10

The Hyderabad Public School, Begumpet (ICSE) Class XII: 81.4%
Ramadevi Public School (ICSE) Class X: 87.5%

Technical Skills

Languages: Python, C++, Java, TypeScript, JavaScript, SQL
Backend: Node.js, Express, Fast API, REST API Design
Frontend: React, Tailwind CSS
Database: MongoDB, VectorDB, PostgreSQL, Supabase
AI/ML: Machine Learning, Deep Learning, TensorFlow, LSTM, SVM, Ridge Regression
Computer Vision: OpenCV, image processing pipelines
GenAI/NLP: RAG-based applications, LLM API integration, prompt engineering
Tools: Git, Docker, Linux, Clerk Auth
Cloud: AWS (EC2, S3, Lambda), Google Cloud, Vercel
Product: 0-to-1 product design, feature mapping, system architecture, product management.

Internship Experience

AI Engineer — BVIT Solutions Nov 2025 – Present (Remote)

- Designed and developed **HireAI** (hireai-vnk.vercel.app) — an AI-driven hiring platform that conducts role-based candidate assessments and AI interviews, generating structured hiring recommendations for recruiters.
- Developing automation pipelines for **NLP and computer vision** tasks using **Python, TensorFlow, OpenCV**; designing RAG-oriented application flows to improve response grounding through retrieval + generation integration.

Full-Stack Developer — Kodryx AI Feb 2026 – Present (On-site, Hyderabad)

- Designed, developed, and shipped **6 production web applications** end-to-end: Aruna Yoga, Skillarion Development, DefenAI Labs, SaveLegs, Dollar, Spirit of Seva.
- Led complete **0-to-100 product design, feature mapping, and system architecture** of **Mee Arogyam** — a unified healthcare management startup; selected for the **Finals of Healthcare Startup Hackathon, Andhra Pradesh**.

Student Researcher — SAE India Jun 2024 – Jun 2025

- Built autonomy subsystems for drone navigation and verification under edge-case operating constraints.
- Won **1st Prize (SAEISS ADDC 2024–25)** for a GPS + QR-assisted navigation and delivery pipeline.

Open-Source Contributor — GSSoC'24 Oct 2024

- Delivered repository contributions including bug fixes and feature improvements in ML-focused open-source projects.

Projects

HireAI — AI-Driven Hiring & Candidate Assessment Platform 2025 – Present
<https://hireai-vnk.vercel.app/>

- Designed and built end-to-end AI workflows for role-based candidate assessment and automated AI interview sessions that generate structured hiring recommendations for recruiters.
- Architected the complete feature map and system design; responsible for AI pipeline design, debugging, and full-stack implementation.

CultureSense — Unified HR Monitoring Platform Nov 2025 – Present
<https://culturesense.in/>

- Designed a role-based HR monitoring workflow with multi-level visibility (employee, team, department) to support organization-wide reporting with connector-driven ingestion logic to standardize data from multiple sources into consistent analytics-ready outputs.

Mee Arogyam — Healthcare Startup (Product Design & Architecture) 2025 – Present

- Led complete **0-to-100 product design, feature flow, and system architecture** of Mee Arogyam, a unified healthcare management platform, through Kodryx AI.
- Selected for the **Finals of the Healthcare Startup Hackathon, Andhra Pradesh** based on product design and feasibility.

Fin-Ledger — Enterprise Financial Management Platform	2026 – Present
Architecting a financial application enabling CAs and finance professionals to manage transactions for companies, enterprises, and individuals with seamless Tally Prime integration.	
CareSync — Healthcare Management System (GenAI)	May 2025 – Present
Built an LLM-powered medical report generation pipeline to create structured clinical drafts (consultation and discharge formats).	
Autonomous Drone Delivery System (AI & GPS Navigation)	Jun 2024 – Mar 2025
- Engineered a drone delivery prototype with QR-based package verification and multi-point GPS navigation logic. - Achieved 95% delivery accuracy during testing; awarded 1st Prize in the national SAEISS ADDC challenge.	
PrimeMedic AI — Intelligent Medical Assistant	Oct 2024 – Apr 2025
https://sandeepgoudmacha.github.io/prime/training-studio-1.0.0/index.html Built an NLP-based assistant prototype for symptom understanding and context-aware medical query handling using retrieval-supported responses; designed as an all-in-one unified healthcare application.	
Patents (Filed & Published — India Patent Office)	
Intelligent Vehicle Safety System (Intelli-Drive)	Filed Oct 2025 Published Nov 2025
Application No. 202541099154 Integrated speed control, collision avoidance & alcohol detection	
JILEBI — Junction Integrated Line Exploration & Boundary Identification Robot	Filed Sep 2025 Published Oct 2025
Application No. 202541087126 Autonomous navigation with multi-sensor fusion & obstacle avoidance	
Advanced Aluminum-Air Battery System	Filed Sep 2025 Published Oct 2025
Application No. 202541087125 Rapid refueling, ML-based intelligent control for EV & energy storage	
Research & Publications	
CloudCrop AI: Personalized, Voice-Driven Agricultural Intelligence	2025
ICICI Conference, BITS Pilani (Accepted for Publication) Co-author	
Multilingual voice-based agricultural DSS; LSTM price forecasting ($R^2=0.89$), SVM cultivation suitability (94.3%), yield estimation ($R^2=0.91$); field deployment with 150 practitioners (satisfaction: 4.7/5.0, acceptance: 87%).	
Leadership & Responsibilities	
Microsoft Student Ambassador	2024 – 2025
Research & Development Coordinator — Entrepreneurship Club	2023 – 2024
CSI Coordinator	2024 – 2025
HR & Documentation Head — StreetCause NGO	2023 – 2025
Awards & Achievements	
- Top 105 Finalist — Google Solutions Challenge 2025 (Top 1%). 1st Prize — SAEISS Autonomous Drone Development Challenge (2024–25). - Best Innovative Idea — Telangana State Finance Commission (Ideathon 2024). - Finals — Healthcare Startup Hackathon, Andhra Pradesh (Mee Arogyam, via Kodryx AI). - Finalist: BITS TechXcelerate’25, AI-Autonomous Hackathon’25, Datanyx’24, IEEE GNIT HackArena’24, Megathon IIIT-H’24, MGIT HackSavvy’24.
